Streamlined systems for perfect packaging

Strong modular packaging systems
made of corrugated cardboard

Packaging
range in
many sizes

MULTI-Cargo
System packaging

Shipments streamlined to the pallet in sensible sizes!

The modular range of boxes that speeds up processes

QUiCK Lock

Exploit capacities to the full

We have developed the *QUiCK Lock* series of boxes for effective, safe and cost-efficient shipping of a wide variety of goods.

The *QUiCK Lock* system offers a range of box sizes in many dimensions, which can be combined on pallets. In this way, capacities in the storage and transport area can be utilized to the full, saving on costs right there.

Speed up processes and ship securely

Further features include the fast-assembly base, the eponymous *QUiCK Lock* fast-closing, adhesive-free mechanism, and multiscoring, all of which speed up assembly and handling through to dispatch.

Longer inside flaps and the safety-lock mechanism inside the base prevent unauthorized access.

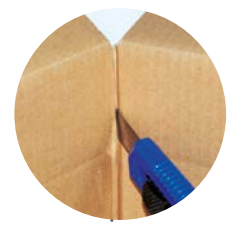

Furthermore, an integrated solution for packing slips and a choice of two grades of cardboard result in the streamlined use of materials tailored to the goods, their weight and the shipping method.

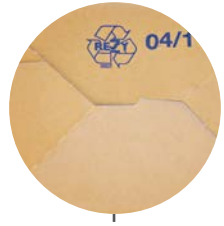

The small S-class:
strong EE flute with folding lid

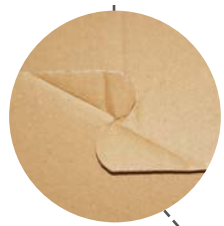

Simply secure:
QUiCK Lock fast-closing lid mechanism and longer inside flaps

Multiscored for
saving on fillers and cushioning material

Self-assembly base
with safety-lock mechanism inside

fast-assembly base

A reliable base – ready to fill within 2 seconds!

Single-wall boxes with fast-assembly base in 19 different sizes

QUICK Lock uno

Boxes with integrated delivery note holder

The fast-closing mechanism and the *QUICK Lock docu* holder with its two integrated tabs to hold documents make *QUICK Lock uno* the perfect picking carton.

Twice the value for money

You save on both the costs for delivery note envelopes and for adhesive tape for sealing as well as on the associated procedures during preparation for shipping.

Tip: Strapping – will save both time and money

Double strength for extra high payload!

Double-wall boxes with interlocking base in 17 different sizes

QUICK Lock duo

Set up in no time and extremely strong

The interlocking base of the *QUICK Lock duo* boxes is set up quickly in four easy moves. The cardboard packaging copes well with extreme load stresses from both the inside and the outside due to the strong double-wall cardboard.

The *QUICK Lock* lid can be closed without the need for adhesive tape.

In addition, the box is multiscored and can be adjusted to its fill height, saving on filling material.

Set up in no time – the interlocking base

Clear to see – multiscored saves on fillers

Useful in combination: flexible length up to 2000 mm!

Coordinated telescopic packaging for lengths of 430 to 2000 mm

TELEscope

Convenient telescopic extension – simply longer

For shipping long items with rather small diameters, we offer our range of telescopic packaging in a number of different dimensions.

The different *TELEscope* box sizes can be used individually or push-fitted in a telescoping fashion for more length. The resulting variable length of between 430 and 2000 mm makes it easy to customize the packaging exactly to its contents.

Shipping without surcharge

TELEscope boxes are also perfect for sending posters, large-scale construction drawings, advertising banners or similar – with no surcharges for tube shipping.

And the handling is easy: The corrugated cardboard boxes feature a much lower specific weight than tubes made from solid cardboard and unlike tubes they won't roll off the table.

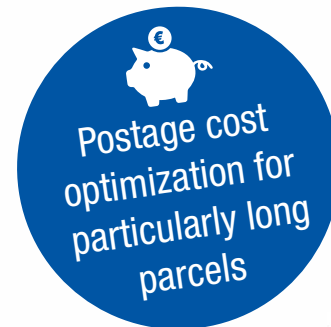

Use the postage-optimized A2/A3S box for standard DIN formats, for example.

Flexible, telescope-like extension by simple push fitting

Our innovative packaging solutions system – a variety of products and performance characteristics for special requirements. **MULTi-Cargo** products stand for:

MULTi-Cargo Cool packaging

SAFETY cool bag

The environmentally friendly way to do temperature-controlled shipping:

- recyclable, paper-based cool bags
- guaranteed food and medicine safe

MULTi-Cargo Cool packaging

FreshBox

Folding styrofoam-insulated corrugated cardboard boxes:

- up to 20 times less storage space required compared with EPS boxes
- self-adhesive seal and tear-open perforation
- food safe

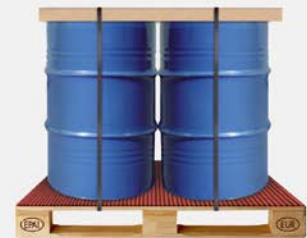

MULTi-Cargo Load security

SAFETY grip

Application-specific anti-slip solutions:

- economical pallet and load securing
- from high-performance mats for heavy loads to special anti-slip mats for drums and canisters
