Bag your environmentally friendly temperature control

Paper-based thermal packaging for posting temperature-sensitive foods and medicines

SAFETY cool bag

Environmentally friendly temperature control

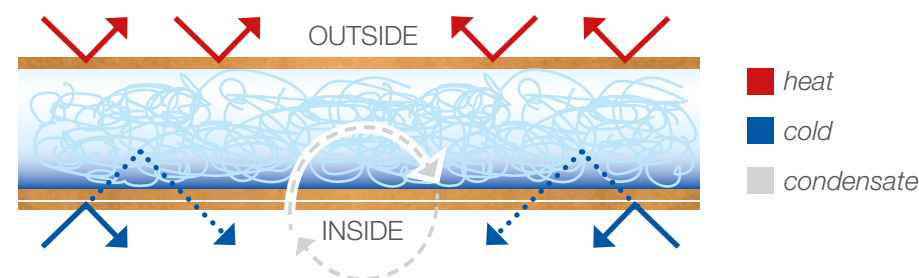

Temperature-focused transport and unbroken cold chains are becoming more important by the day in the ever-expanding mail order sector. Sellers of fresh food boxes as well as mail order pharmacies have very stringent requirements regarding suitability for use with foodstuffs and medicines.

With our *SAFETY cool bag*, we offer insulated packaging in a variety of sizes, developed specifically for the stable-temperature shipping of foods and medicines that must be refrigerated. *SAFETY cool bag* is made from odour-neutral, taste-neutral and low-migration paper-based materials and is 100% recyclable.

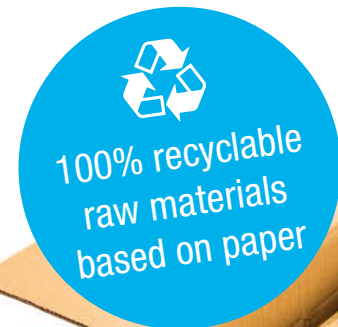

A temperature of 2 °C to 8 °C guaranteed for up to 48 hours

The fibre mixture encased in a multi-layer paper sleeve insulates the goods inside the bag from external heat. The insulation reflects and stores cold and thus keeps the temperature inside the packaging constant for up to 48 hours.

Any condensate forming will be absorbed by the insulation and released later.

This protects and reliably cools your products for the entire duration of transport. What's also cool is that after use, the convenient *SAFETY cool bag* packaging can simply be disposed of as waste paper.

Eye-catching closure

Use custom-printed adhesive labels to close the cool bag – simply fold the bag along the seam and seal with your advertising message.

Guaranteed food and medicine safe

SAFETY cool bags are both food safe and medicine safe – the raw materials used are completely odour neutral, taste neutral and low migration.

Also available in a non-insulated version

Use our uninsulated paper bags for a unified appearance when adding temperature-insensitive products as part of your shipment.

From small to wow!

SAFETY cool bags are available from stock in sizes S, M, L and XL. Custom sizes and dimensions on request!

Item no.	Description	Size	Colour*	Exterior dimensions in mm	Items/pallet
00028177	Insulated <i>SAFETY cool bag</i>	S	brown/brown	approx. 350 x 400/350	156
00028178	Insulated <i>SAFETY cool bag</i>	M	brown/brown	approx. 400 x 450/400	156
00028179	Insulated <i>SAFETY cool bag</i>	L	brown/brown	approx. 400 x 550/500	100
00028180	Insulated <i>SAFETY cool bag</i>	XL	brown/brown	approx. 500 x 650/600	50

*Available in white/white on request.

SAFETY cool custom

Brand message on the outside, perfectly functional on the inside

A uniform brand identity is part of a professional image. Let your custom-printed cool bags, adhesive labels and cardboard packaging work as your company's ambassadors. We will gladly advise you on options and terms.

We will also be happy to provide you with information on organizing modules, such as folding or push-in box dividers for creating different packing or temperature zones within the shipping carton, or on special sizes appropriate to your range of products.

System packaging with box dividers for different temperature zones inside

Custom printing for orders of 10,000 items or more

Cool bags in special dimensions on request

Cool, convenient, portable – and sustainable, too

Convenient paper cool bags for transporting frozen foods and more

SAFETY cool handle

Certified for foodstuffs

The new environmentally friendly cool bag for retail

The face of the retail shopping bag has changed: What was once a free disposable item is now a statement of sustainability and protection of the environment.

Even service packaging like aluminium-composite cool bags are increasingly at odds with end consumers' desire for environmentally friendly packaging.

SAFETY cool handle is a state-of-the-art, 100% recyclable, insulated carrier bag made from paper. The reusable cool bag consists of odour- and taste-neutral as well as low-migration materials and was developed specifically for transporting foodstuffs.

With its strong, fine-corrugated board handles, this carrier bag can transport up to approx. 12 litres of refrigerated products safely and easily.

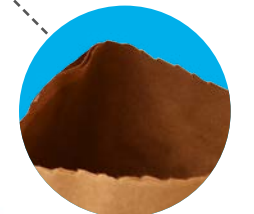

Triple insulated – keeps cold inside and heat outside

Three layers of kraft paper protect against heat from the outside with a simple but highly effective principle: Due to the extremely low thermal conductivity of cellulose, which is the raw material for paper, SAFETY cool handle keeps even deep-freeze temperatures inside the bag just as constant as with conventional aluminium-composite cool bags.

And once our re-usable cool bag is no longer needed, it can be disposed of as waste paper.

Simply good insulation with three layers of kraft paper

Use the handle to easily close the bag

SAFETY cool handle in four sizes

Item no.	Description	Size	Colour*	Exterior dimensions in mm	Items/pallet
00030547	3-layer carrier bag SAFETY cool handle, handle F flute	S	brown/brown	approx. 349 x 396/456	approx. 2000
00030592	3-layer carrier bag SAFETY cool handle, handle F flute	M	brown/brown	approx. 398 x 448/508	approx. 2000
00030594	3-layer carrier bag SAFETY cool handle, handle F flute	L	brown/brown	approx. 398 x 545/605	approx. 1500
00030595	3-layer carrier bag SAFETY cool handle, handle F flute	XL	brown/brown	approx. 500 x 650/710	approx. 1500

Our innovative packaging solutions system – a variety of products and performance characteristics for special requirements. **MULTi-Cargo** products stand for:

MULTi-Cargo System packaging

QUICK Lock

Our family of boxes for pallets:

- fast-assembly boxes with fast-closing lid
- telescopic packaging
- DIN/ISO packaging
- cardboard packaging with delivery note pocket

MULTi-Cargo Cool packaging

Folding Styrofoam-insulated corrugated cardboard boxes:

- up to 20 times less storage space required compared with EPS boxes
- self-adhesive seal and tear-open perforation
- food safe

MULTi-Cargo Point of Sale

PICK & GO

Boxes for retail and mail order:

- checkout boxes made of corrugated cardboard
- convenient handle boxes
- stackable cardboard crates
- archive boxes with fitted lid and logistics boxes for shipping
