

# Maximum efficiency in thermal shipping

Folding polystyrene-insulated corrugated cardboard boxes

  
Flat in storage  
and great  
for shipping

**MULTI-Cargo**  
Cool packaging

# Make a sustainable impression

Storage-optimized, ready-to-ship cool boxes in two sizes – available with custom printing

## Temperature-controlled shipping – convenient and light

Polystyrene is a well-known and efficient insulator. Whether you need to keep the temperature of chilled or frozen products stable for the entire duration of transport or you need to protect goods sensitive to frost from the outside, polystyrene ensures excellent insulation during long transport times and thus becomes the perfect component for the new *MULTI-Cargo FreshBox*.

## Flat in storage, big on cost saving

Pure EPS boxes are extremely bulky to store. In addition, they require extra packaging materials such as adhesive tape or strapping.

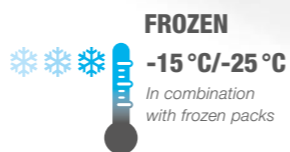

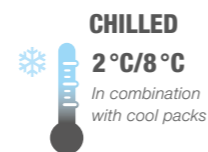

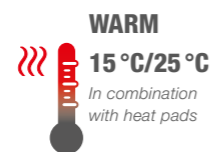

Up to 20 times less storage space required compared with EPS boxes

Much better – the *MULTI-Cargo FreshBox* is both insulation and shipping box in one. Based on corrugated cardboard, the *FreshBox* requires up to 20 times less storage space – delivered flat in stacks of 50 per pallet, it guarantees optimum space-saving storage.

## Constant temperatures for 24 to 48 hours

Our *MULTI-Cargo FreshBox* keeps the temperature zones (heat and cold) reliably constant for up to 48 hours – even longer with the help of heat pads or cool packs.

Item no.	Description	Colour of material*	Exterior dimensions in mm*	Interior dimensions in mm	Volume inside	PU	Items/pallet
00029793	Insulated <i>FreshBox</i>	brown/brown	385 x 280 x 210	335 x 240 x 160	approx. 13.0 litres	50	50
00029151	Insulated <i>FreshBox</i>	brown/brown	455 x 345 x 250	400 x 305 x 205	approx. 25.0 litres	50	50

\*Available on request in further sizes, with white cover and with custom printing.

Convenient – self-adhesive seal and tear-open perforation

## Self-adhesive seal and tear-open perforation

The thermal box is available in two popular sizes and can be set up and closed with no need for additional materials. It is closed by means of the convenient self-adhesive seal.

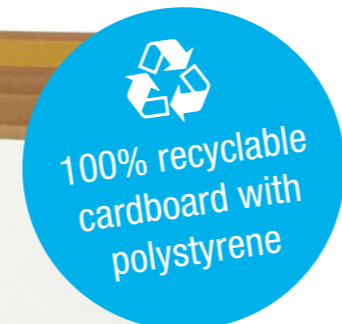

It is just as easy for your customers to access the goods later thanks to the convenient tear-open perforation.

## FSC®-certified corrugated cardboard for more sustainability

The cardboard gives the box its stability and strength; only a minimum amount of polystyrene is needed for insulation.

When assembled, the corrugated board walls are folded around the polystyrene and thus increase both stability and insulation effect. Any condensate forming is absorbed by the cardboard and released later.

The box sizes can be adjusted to the volume of the goods. In this way, you save yourself expensive and unnecessary cushioning and cool packs.

20 mm of polystyrene for excellent insulation

Certified food safe

Custom printing for orders of 4,000 items or more!

## Discover now . . .

Our innovative packaging solutions system – a variety of products and performance characteristics for special requirements. **MULTi-Cargo** products stand for:

### **MULTi-Cargo** Point of Sale

#### **FOOD** pad

Custom sheets of glassine corrugated cardboard:

- reliably greaseproof
- guaranteed food safe (ISEGA certification)
- custom sizes – up to 110 cm wide

### **MULTi-Cargo** Cool packaging

#### **SAFETY** cool bag

The environmentally friendly way to do temperature-controlled shipping:

- recyclable, paper-based cool bags
- guaranteed food and medicine safe

### **MULTi-Cargo** Point of Sale

#### **PICK & GO**

Boxes for retail and mail order:

- checkout boxes made of corrugated cardboard
- convenient handle boxes
- stackable cardboard crates
- archive boxes with fitted lid and logistics boxes for shipping
